## Natural Herbal Formula To Activate Immune System Response

When the immune system needs a bit of a boost, Cedar Bear Naturales® Immune Booster is just the thing. Echinacea and Oregon grape root are well known for their abilities to boost the immune system to help the body overcome immune challenges, speed healing, and reduce inflammation. These herbs help to activate macrophages and white blood cells to assist in immune system battles. When taken at the first sign of symptoms, these herbs can also help boost the immune system to help stop a problem before it can take hold.

Immune Booster is an immune system activator that nutritionally supports and stimulates resistance to acute health imbalances. In addition to the immune-stimulating support that echinacea and Oregon grape root give this formula, the combination of herbs in Immune Booster support the digestive system, the liver and gallbladder, and the lymphatic system with antiseptic properties, drawing out excess mucous from a congested respiratory system, and help to reestablish the pH buffering of the stomach to support immune action.

This formula is especially effective if taken when an immune challenge is suspected or imminent before symptoms have a chance to take hold to help prevent illness. One example is when a family member has come down with cold or flu symptoms, but no one else in the family has. If the whole family takes this formula, most likely the person with the symptoms will get better more quickly and the other family members either won't get the symptoms at all or they will experience far lighter cases. It's like having a healthy herbal immunization in a bottle!

### MORE ABOUT THE HERBS IN THIS FORMULA:

- Echinacea Purpurea (*Echinacea purpurea*) contains polysaccharides and phyosterols that contribute to echinacea's valuable action as an immune system stimulant. Echinacea purpurea has a gentler stimulating action on the immune system than echinacea angustifolia.

- Oregon Grape Root (*Berberis aquifolium*) contains berberine, the immune activating constituent in goldenseal) supports immune function, and has antibacterial and antiseptic properties. Similar immune system action as goldenseal, only much gentler.

- Black Walnut Hull (*Juglans nigra*) is rich in iodine, a necessary component for many immune functions in the body. Black walnut hull has a purifying immune action on the lymphatic system and is also anti-parasitic.

- Lemon Peel (*Citrus limon*) is a powerful liver tonic and helps to reestablish the pH buffering system of the stomach, supporting efficient function of this part of the immune system. It helps to neutralize and destroy germs in the digestive system.

- Thyme Leaf (*Thymus vulgaris*) has strong antiseptic and germ reducing activity in the gastrointestinal and respiratory systems, as well as the kidneys. Helps the body rid itself of mucus in the nasal passages.

- mBI™ is a proprietary micro-fractionated liquid trace mineral supplement made using the exclusive CBN™ Citritol™ process, essential to the enzymatic processes.

- Aromaceutical™ Blend: Specially formulated to enhance a strong immune response, working through the liver and the digestive system.
