Great Tasting 100% Alcohol-Free Liquid Herbal Products

## An Herbal Formula That Supports Male Reproductive System Health

Protecting and improving the health of the male reproductive system is a sensitive subject. While most men would rather not address this issue, an old adage "an ounce of prevention is worth a pound of cure" applies to men's health.

By age fifty, many men experience swelling in the prostate gland and diminished sexual function. This challenges immune system health and emotional wellbeing. With today's high stress lifestyles and poor nutritional support, more men are affected than ever before.

Male Plus by Cedar Bear Naturales® is an herbal formula specifically created for building and supporting the health of the adult male reproductive system through nutritional herbal support. It is designed for daily use to relieve minor inflammation of the prostate gland and improve general male reproductive health issues.

Male Plus supports and sustains male hormone production without upsetting natural functions by providing necessary micronutrients, mineral electrolytes and trace elements that support male hormonal balance and overall health.

This formula is designed to not only help reduce inflammations, but to be used as a health tonic before problems develop. Urinary retention caused by prostate enlargement can become a real problem to health. The herbs in Male Plus helps reduce inflammation that causes retention.

This formula may be used by both men and women for relieving general emaciating/wasting conditions.

CONTAINS: Pygeum bark, saw palmetto berry, eleuthero root, damiana leaf, horsetail leaf/stem, prickly ash bark, and mBI™ Liquid Trace Minerals in a kosher certified vegetable glycerin/purified water TincTract® base.

NOTE: In case of concern for prostate health, consult a qualified health practitioner.

SUGGESTED USE: 1/3–1/2 teaspoon (2–2.46 ml) one to three times a day as a daily tonic, or as needed.

### MORE ABOUT THE HERBS IN THIS FORMULA:

• Pygeum Bark (*Pygeum africanus*) reduces inflammation of the prostate and promotes prostate health. This herb helps bring down urinary problems and reduces nighttime urination and urinary frequency. It can help to improve male fertility, lower cholesterol, and improve sexual function. This herb

does not stimulate estrogen production in men.

• Saw Palmetto Berry (*Serenoa repens*) helps to reduce enlarged prostate and relieves irritation in the genitourinary tract. It regulates hormones in a way that eases prostate swelling without affecting sexual performance. Reduces urinary difficulties such as nighttime urination.

• Eleuthero Root (*Eleutherococcus senticosus*) is an adaptogenic herb that is a general glandular and immune tonic that cools and moistens the body's systems and is often used in male tonic formulas. In men, this herb stimulates the production of testosterone and helps increase sex drive and reduce impotence. It also is used to benefit athletic performance and reduce frequency of getting sick due to being run down from overworking.

• Damiana Leaf (*Turnera diffusa*) is a glandular builder that is very effective in male glandular formulas. It helps balance hormones, lift mood, and has an antiseptic action in the urinary system. This herb helps improve sexual function with regular use. In Central America, it was used by the Mayan civilization for its aphrodisiac qualities.

• Horsetail Leaf/Stem (*Equisetum arvense*) is high in silica and is a mildly cooling diuretic that supports the kidneys and urinary system. Horsetail builds tissue health.

• Prickly Ash Bark (*Zanthoxylum americanum*) acts as a mild stimulant to the glandular system while reducing irritation in the tissues. It improves overall circulation, and supports the lymphatic system and toxin elimination from the body.

• mBI™ is a proprietary micro-fractionated liquid trace mineral supplement made using the exclusive CBN™ citritol™ process. The complex trace mineral compounds found in mBI™ enrich and assist important enzymatic.
